

JUSTRITE® *New!* Product

ESSENTIALS

JUSTRITE® Sure Grip™ Safety Cabinet *Featuring new flush handle design*

Cabinets are constructed of sturdy, double-walled 18 gauge steel with 1 1/2" of insulating air space for fire resistance. Sure Grip™ Cabinets offer unique features:

- Attractive flush-mounted handle, ideal in tight spaces and less prone to damage in shipping.
- Fingertip control with an exclusive slip resistant textured lining on inside of handle.
- Self-latching handle ensures engagement of 3-point latch for protection under fire conditions.
- Radiused corners on doors for added safety.
- Patented combination latching system to assure complete, smooth closure every time.
- Chip guard along door edge to protect paint from bullet latch impact.

Galvanized steel "spill-catcher" shelves interlock with welded hangers and adjust on 2 1/4" centers for "no slip" stability. All cabinets include a leak-tight 2" sump, dual vents with built-in flash arresters, a built-in grounding connector, tri-lingual warning label, four adjustable leveling feet and superior powder paint finish.

Self-closing models also meet the Uniform Fire Code and feature a fusible link that melts at 165° F to automatically shut doors in case of fire.

All cabinets meet OSHA 29 CFR 1910.106 and NFPA Code 30 and most are FM Approved.

No. 29450

OSHA compliant safety cabinets provide safe, secure storage and organization for flammable liquids. They minimize employee exposure, reduce fire risks, and add to efficiency when positioned near points-of-use.

Built to the highest quality standards, all Justrite cabinets are designed to meet NFPA standards and OSHA regulations. Most have been fire tested and approved by an independent third party agency, Factory Mutual, to ensure performance to demanding standards.
