Spill Control Funnels

Large Diameter Funnels Provide a Simple Cost Effective Way to Collect Liquids and Keep Drum Tops Clean

The Gator™ polyethylene spill control funnels fit all closed head 30- and 55-gallon drums. Low profile, wide diameter offers big “target” for quick, easy pouring.

Scalloped, sloping design minimizes splash and prevents containers from resting in their own liquids. Large flat well at throat of funnels allows for passive draining of paint cans, filters, buckets and other containers. Molded in hook makes it convenient to store optional funnel cover.

Model 28211 includes a drum fill vent with 6" perforated brass flame arrester. Threaded bung cap seals in flammable vapors under normal storage conditions. In emergency, pressure relief valve opens to protect drum and prevent explosion.

OSHA = Occupational Safety & Health Act

Specifications

Model No.	Description	Outside Dimensions x H (cm)	Sump Capacity (L)	Ship Wt. (kg)	Compliance
28210	For non-flammables	21 x 3.25" (53 x 8cm)	2.5 gal. (10L)	5 lb. (2kg)	OSHA
28211	For flammables	21 x 3.25" (53 x 8)	2.5 gal. (10)	7 lb. (3)	OSHA
28215	Cover for Funnel 28210	19 x 1.25" (48 x 3.17)	N/A	5 lb. (2)	N/A

Single and Double Drum Collection Centers

Provide safe, effective and economical spill control for 55-gallon drums

These rugged drum collection centers are made of all-weather, chemical-resistant Gator-Tuff polyethylene that will stand up to the harshest environments, and they're designed to be forkliftable for easy relocation. **The Single Drum Collection Center** has a large-diameter opening in the top, so loading a drum is fast and easy. It's ideal for storing, pumping or collecting liquids, and its compact size makes it the perfect choice when space is limited. Empty bases nest for convenient storage. **The Double Drum Collection Center** accommodates two 55-gallon drums, and it's ready to contain any accidental spills. Dual covers can be opened separately to provide convenient access to either drum, or they can be closed together and locked to prevent unauthorized access (lock included). The base can be used as an indoor pumping station. Get the Double Drum Collection Center with the covers and lock, or get just the base. Both collection centers are fully compliant; each unit's sump capacity meets EPA requirements.

Specifications

Model No.	Description	Outside Dimensions x H (cm)	Sump Capacity (L)	Ship Wt. (kg)	Compliance
28250	Double Drum Center	60 x 39 x 47" (152 x 99 x 119cm)	180 gal. (681L)	80 lb. (36kg)	EPA, UFC
28255	Center Base Only	60 x 39 x 27" (152 x 99 x 69)	180 gal. (681)	51 lb. (23)	EPA, UFC
